## Additional Backup Information

This project is for the construction of a new water line and relocation and adjustment of existing water lines in conflict with the Texas Department of Transportation (TxDOT) IH 35 Mobility Roadway Improvements from North of Oltorf Street to South of Oltorf Street. The work consists of the construction of approximately 530 linear feet of new 24-inch water line, relocation of approximately 530 linear feet of existing water line, gate valves, jacking and boring, wet connections, valve castings and appurtenances crossing Interstate 35 main lanes and the northbound and southbound frontage roads. This project is a federally funded project. TX DOT is responsible for providing 100% of the engineering and construction costs and, reimbursing the city for inspection and administrative cost of the projects, except "betterments". The City is responsible for all relocation and adjustment costs that are incurred to construct "betterments", which are any new elements of water infrastructure that provides greater capacity than, or is otherwise materially superior to, the existing infrastructure.

The total contract amount associated with the design, and construction of the infrastructures and betterments is

\$766,000.00. Additionally the City will budget 20% contingency for construction costs.

This project is located within zip codes 78744 and 78745, within council districts 3 and 9, and will be managed by the Public Works Department.
